

DEFIA

Declaration of Conformity to RoHS and REACH

Defia Oy is a contract manufacturer of electronics products "EMS". Products produced in Defia Oy are typically installed to be a part of larger systems or some products can also be operated independently.

Defia Oy is aware that the EU directive 2011 / 65 / EU (RoHS)(including 2015/863) is limiting the use of certain hazardous substances in electric and electronic equipment. In particular substances are listed:

- Mercury
- Chromium VI
- Cadmium
- Certain flame retardants and plasticizers
- Lead

We are also aware that EU directive 1907/2006 is concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)

We hereby declare that:

- *We use only components, parts and materials that are in accordance with RoHS directive, unless customer sets a requirement for deviation (e.g. Defense products)*
- *Soldering materials used in production are lead free unless specific technical requirements defined by customer are demanding for other lead containing soldering metals (e.g. Defense products)*
- *If our suppliers are not defined by our customer, we use suppliers and subcontractors that are aware of RoHS directive requirements, unless there is need for specific obsolescent or hard to find material (e.g. spare parts)*
- *All specifications and instructions defined in product documentation from customer will be followed (e.g. Bill Of Materials "BOM")*
- *We do not manufacture or supply chemical substances and produced items do not involve the intentional release of substances. Accordingly, we see REACH directive not applicable to the products we supply to you or to other customers.*
